

BURNSIDE Mobile

ROAD MAINTENANCE

BURNSIDE MOBILE

New Web Application

The new Burnside Mobile web application is built using the Geocortex Essentials development platform.

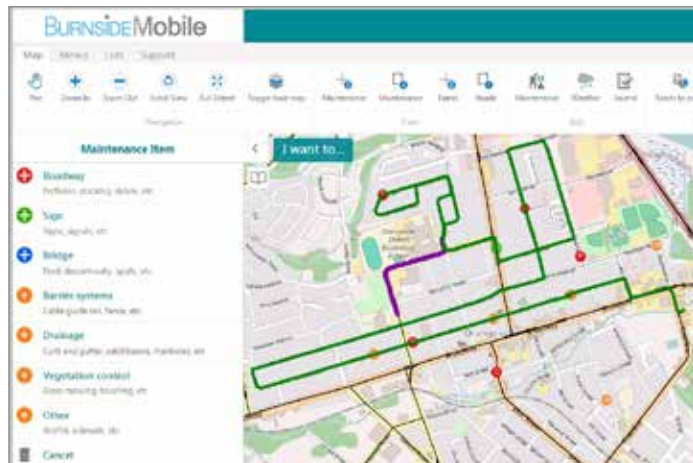

Powerful and Affordable Software

Burnside Mobile provides unlimited licensing, so your patrollers, repair crews, supervisors and administrators can all have access to powerful data collection and reporting tools. Burnside Mobile is an affordable solution for small and large municipalities alike.

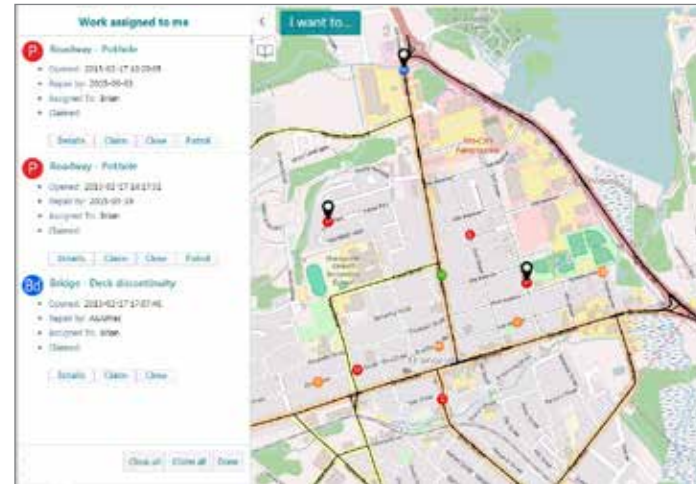

Data Collection

Data collection with Burnside Mobile is easy. GPS data collected during patrols allows for the application to identify which roads have been patrolled. Quickly identify the location and nature of deficiencies with a few taps on your GPS enabled iOS or Windows device.

Work Orders

Assign work that can be received directly by field staff on their smart device,

Or create a traditional paper work order.

City of Smithville
Work Order 2015-00004

Drainage - Catch basin

Service By:	Request Generated By: Brian
Inspected On: 2015-02-17 17:17:05	Inspected By: Brian
Status: Assigned	Assigned To: Brian Berry

Reporting

Time-saving reports show when roads need to be patrolled based on their designated patrol frequency and date of last patrol (this can be displayed any time while on patrol).

You can generate detailed reports for any road section showing patrol and maintenance information.

Integration

A new Cityworks link will be available soon. Burnside has experience integrating with other work management systems (Cartegraph, WorkTech, Weave/Direct IT), and will offer these integrations with future versions of the new Burnside Mobile.

Setup is Simple

Your field, administration and supervisory staff can be up and running with Burnside Mobile in less than a day, and our support staff is always there when you need us.

Training is Easy

Software is designed for field staff with a basic understanding of smart devices/computers.

Sidewalk/Trail Inspection and Winter Patrolling

Burnside Mobile also offers specialized applications for sidewalk inspection and winter road patrolling.

"I would like to comment on how well we at Central Elgin are enjoying your software. I have introduced Burnside Mobile to all of our operators, and each one of them used it with a minimal amount of training. I have received numerous positive comments from them, they all love it."

Michael J. Hare, CRSI
Operations Superintendent
Municipality of Central Elgin
